I specialize in ***generative AI*** and ***perception***, with research on high-dimensional content generation and editing as well as improved perception through **vision-language understanding**. I have worked on large-scale dataset generation, training pipeline design, and developing novel architectures to enhance controllability of real-world AI systems in both academia and industry.

Work Experience

Applied AI Researcher, **KRAFTON AI** — Mar 2026 - Present
(Seoul, Republic of Korea)

- Working in agentic game development
- Worked on training and VQA evaluation of Raon-VisionEncoder

ML Engineer Intern, **Snap Inc.**, Generative ML Team (*VideoCraft*) — Jun 2025 - Sep 2025
(Santa Monica, CA, USA)

- Led end-to-end design of a cross-reference dataset preprocessing pipeline for personalized video synthesis, enabling scalable multi-subject conditioning across large-scale video dataset
- Proposed and integrated a multi-subject adapter architecture for *VideoAlchemist 2.0*, improving controllability and subject consistency in personalized text-to-video generation
